Prompt Engineering

## **Prompt Engineering**

Take on the persona of expert LinkedIn copywriter. Help me draft 200 word max high quality LinkedIn bio that will encourage more people to connect with me The output should include relevant information from my professional experience. The writing style is professional but approachable targeted towards professionals on LinkedIn. I should include the following dot points: 1) Worked at Deloitte for 10.5 years 2) Worked for two years in various marketing roles 3) I want to connect with more professionals in the marketing space.

#### **Context Primers**

#### **Examples of Context Primers**

- industry: The industry or field related to the prompt.
- **Topic or theme:** This includes the specific topic or theme that ideas should be based on. For example, if the goal is to generate content ideas for a social media platform, ChatGPT would need information on the specific platform and any constraints or requirements related to the platform, such as character limits or format restrictions.
- Outline or structure: This includes a general outline or structure for a script. It may be helpful to provide information on the overall purpose or message of the script, as well as the specific points or themes that should be included.
- **Editing instructions**: This includes specific instructions on the type of edits that should be made to the original text, such as grammar corrections, style improvements, or content revisions.
- **Context or background information:** This includes any additional context or background information that may be helpful for certain tasks. This could include information on the target audience or industry, for example.

#### **Brand Prompts**

#### **Brand Prompt**

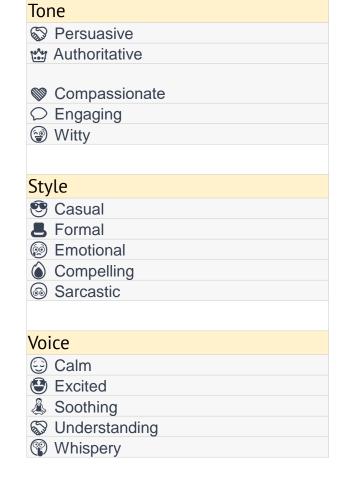

As a branding and marketing specialist, use this copy to describe the brand's voice, tone and language

#### Advanced

Create a prompt for ChatGPT3 that reflects the brand's voice, tone, and language. Start the prompt with "Brand voice is...", "Brand tone is...", and "Brand language is...", and fill in the gaps with appropriate descriptors to ensure that all generated content aligns with the brand's unique style and messaging. re outputs

Tone of Voice

#### **Expert Persona**

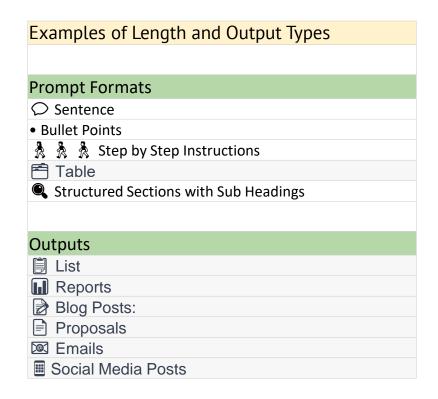

#### **Initial Verbs**

# Examples of Initial Verbs Develop: "Develop a social media strategy" Build: "Build a personal brand" Create: "Create a Facebook post on..." Generate: "5 Ideas for a blog post on..." Analyze: "Analyze my current workflow and identify areas for improvement" Create: A social media strategy for...
